### UKS2 Booster group

[illegible]

## **Analysis**

- Children in Year 4 made the most progress out of any year group, justifying our decision to prioritise these children this year (they swam for two terms instead of one). 84% of this cohort were able to swim 25 metres or more. 26% of these children swam 50 metres and 25% swam 100 metres or more. These figures put these children in a strong position moving forward into Years five and six.
- Our Year 6 data was impacted by a large number of new children who joined this year and had little previous experience of swimming. Nevertheless, 75% of children were able to swim 25 metres or more.
- We introduced a new booster group for children in upper key stage two. Many of the previously mentioned children from Year Six were part of this group. By the end of the half term, 47% of children were able to swim 25 metres, showing that the smaller group sizes allowed these children to flourish. Furthermore, 17% of children (who previously had no experience of swimming) were able to swim 5 metres.
- In Key Stage One, 34% of children were able to swim 5 metres or more. However, there is more of an emphasis on water safety in these year groups and children are expected to make accelerated progress as they move into Years three and four.
